

ELISSA URBEN 5W-30 SN/CF

ENGINE OIL SYNTHETIC

	QUICK START IN ALL WEATHER CONDITIONS		EXCELLENT FILTERABILITY		HIGH VISCOSITY INDEX
	HIGH PERFORMANCE PROPERTIES		SURFACE PROTECTION AGAINST CORROSION		HIGH LEVEL OF PURITY

ELISSA URBEN 5W-30 SN/CF is a fully synthetic all-purpose premium class engine oil intended for use in passenger cars and commercial vehicles, as well as in petrol and diesel engines that are equipped with pump-injector units, turbochargers and the latest exhaust gas treatment systems. It is favorable to use this product in engines equipped with a particulate filter and/or a catalytic converter. It has high levels of stability in terms of viscosity and fluidity.

ADVANTAGES

- high-performance detergent additive package extensively inhibits oxidation and contamination on the elements of piston-cylinder assembly;
- perfect lubrication properties of the oil provide optimal oil film thickness at various hard operation modes of the engine;
- due to exclusive dispersing capacity, soot decomposes and its particles remain in suspended state during the whole service life, from change to change. And particles don't accumulate in internal volume of the engine, don't choke in filters and valves;
- has perfect neutralizing ability and provides reliable protection of lubricated surfaces from corrosion;
- stands out for its stable viscosity and high fluidity, guaranteeing quick engine start at cold climate conditions;
- its operational characteristics exceed requirements of most of similar products from Russian and international manufacturers.

RECOMMENDED FOR

- Modern four-stroke engines in passenger cars and commercial vehicles.
- The start-stop driving style of urban life.
- All-season use in various climates.
- Providing energy and environmental safety in populated areas.
- Increasing the service life of the parts of the cylinder-piston.
- Use at high speeds.
